

# Assessment

## Monitor practise and assign tasks

Auralia makes it simple to track student progress, deliver assessment tasks and meet curriculum requirements.

Create tasks and courses using the included content or import your own. Using Auralia will save you endless hours of preparation and grading.

# Class Management

Classes are a key feature of Auralia, allowing you to group your students and choose content that is most appropriate for each group.

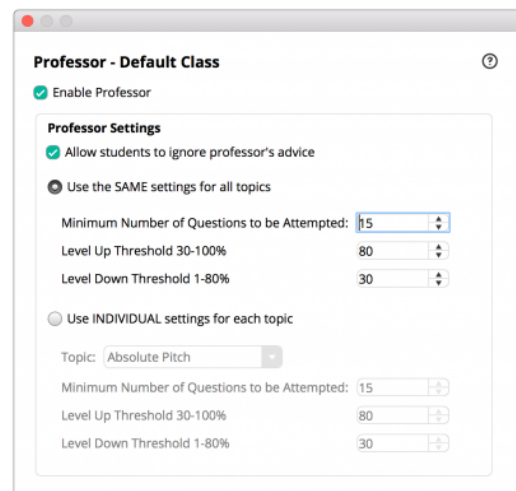

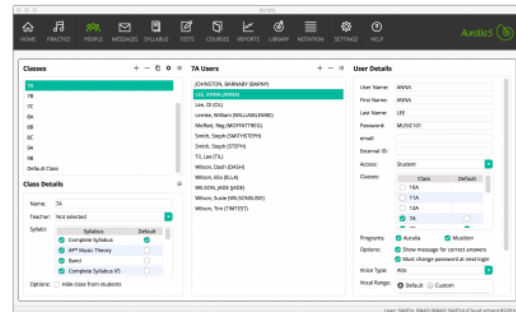

Once setup, classes allow you to control a number of items for your students;

- ✔ Selecting available topics
- ✔ Assigning appropriate syllabuses
- ✔ Setting tests & worksheets
- ✔ Assigning courses

In addition to this, many features such as question retries are set by class, ensuring that students in different courses have the correct settings for their age and ability.

The professor is another excellent class feature, a simple and effective tool for guiding students through practise levels.

Students can now belong to multiple classes, a feature that gives teachers enormous flexibility with content delivery. Addressing differing student requirements is now so much easier!

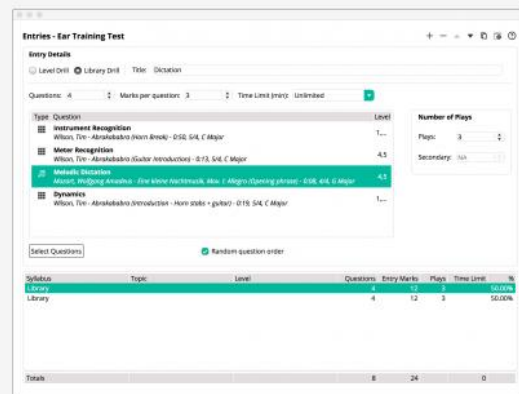

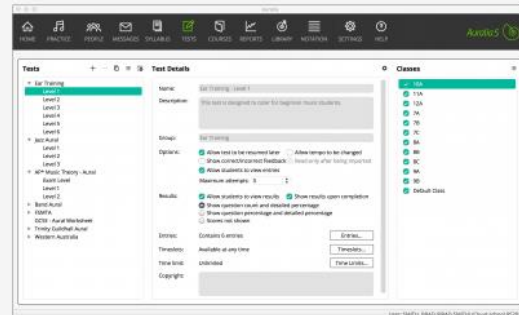

# Tasks & Worksheets

Teachers often wish to set a particular task for their students, be it an ear training quiz or formal assessment.

The testing feature in Auralia makes this very very easy. Tests can contain questions from any syllabus, topic or level, and may also include library questions, which are perfect for use in exams.

- ✔ Include library questions
- ✔ Assign a test to any class
- ✔ Optional random question selection
- ✔ Optional time limits
- ✔ Set due dates and timeslots
- ✔ Weighted scoring options

Many teachers use tests every per week, setting students numerous small tasks. This method keeps student engagement high and makes reporting very simple for the teacher.

# Assessment & Reports

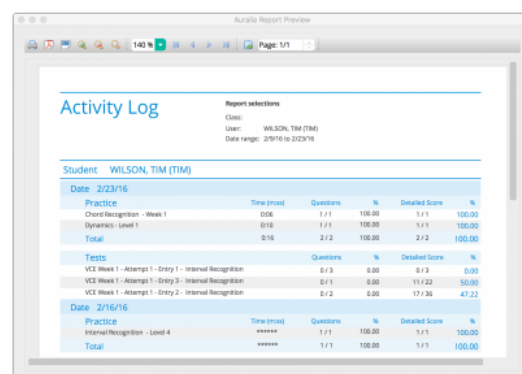

Auralia has an excellent reporting system, allowing you to easily monitor progress and provide the best direction for your students.

Scores are kept separately for the following areas;

- ✔ Practise
- ✔ Tests
- ✔ Courses

For each of these areas we record the amount of time spent, for each day and this is now visible on all reports. Some of the most important reports are listed below.

- ✔ Student summary
- ✔ Student activity log
- ✔ Practise results, overall score

- ✔ Test score, overall
- ✔ Course results, overall

When you are viewing reports we have many intelligent filters to reduce the amount of information to digest.

- ✔ Percentage – highlight weak or strong students
- ✔ Class – only look at your students!
- ✔ Date – now with handy presets
- ✔ Test attempts – ‘best’, ‘last’, ‘combined’ scores

Any report can be exported as PDF or CSV.

The screenshot shows a web browser window displaying a report titled 'Test Results Entries'. The report is for a class named 'Twinley Goldfish Aural - Grade 2'. It includes a table with columns for 'Test', 'Score', 'Marks', 'Percentage', and 'Detailed Score'. The table lists several tests such as 'Reading Comprehension', 'Spelling', and 'Punctuation', along with their respective scores and percentages. A summary row at the bottom indicates 'Total for this student' with a score of 25, a percentage of 88.33, and a detailed score of 467.66.

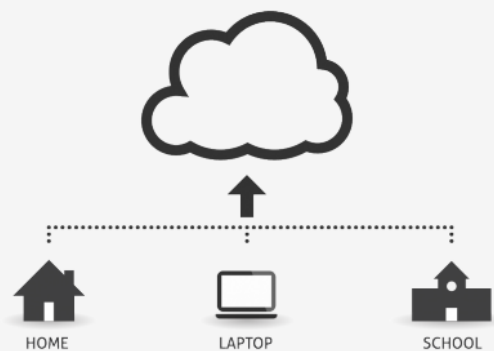

Test	Score	Marks	Percentage	Detailed Score
1 Reading Comprehension Grade 2	100	112/125	88.33	100.00
2 Spelling Grade 2	100	112/125	88.33	100.00
3 Punctuation Grade 2	100	112/125	88.33	100.00
4 Punctuation Grade 2	100	112/125	88.33	100.00
5 Spelling Grade 2	100	112/125	88.33	100.00
<b>Total for this student</b>	<b>25</b>	<b>112/125</b>	<b>88.33</b>	<b>467.66</b>

## Cloud

Cloud allows students to cost effectively use Auralia both on and off campus.

All student results are stored on our cloud servers, allowing teachers to check progress, create and assign tests, and print reports, at school or at home.

- ✔ Use on all school computers and laptops
- ✔ Students can use on home computers
- ✔ Set and track homework & assignments
- ✔ Results, classes, syllabi, tests are all stored on internet cloud servers
- ✔ Easy to install and deploy

## Networking

Although most teachers prefer to use Cloud, it's definitely possible to use Auralia on your local network.

If Auralia is correctly networked you won't have to gather and collate student results from multiple computers. Students can use any computer that is connected to your network, but only within your school.
