

WHAT'S NEW

We have streamlined String Studio and brought it to a whole new level—it will change your perspective on what a synthesizer can be.

NEW Two-Voice Multitimbral

String Studio VS-3 combines two independent timbres—either stacked or split—to create performance-friendly, texture-full, and spacious sounds that are sure to make a good impression.

NEW Modulators

String Studio VS-3 now boasts two performance modulators per layer that respond to user-defined MIDI controls. Each and every sound features effect and morphing assignments that can be played in real time for enhanced expressivity and sonic dimension.

PEPPED Factory Library

A long and fastidious process of fine-tuning went down in the AAS quarters. Each and every sound went under the eyes of all team members to exit with a consistent gain-stage, unity-gain effects, better dynamics, and compelling real-time sound transformation assignments. This is our most perfected sound library to date.

NEW Signature Sound Packs

String Studio VS-3 ships with four brand-new signature sound packs created by the industry's top sound designers. Richard Devine, Christian Laffitte, Thiago Pinheiro, and Daniel Stawczyk form an incredible team that made the most of the latest String Studio VS-3 features. It's with great pride that we present these 227 new sounds.

NEW Browser

String Studio VS-3's improved sound browser presents a simple way to find the sound you're after. String Studio VS-3 sorts sounds by category to present an overview of a pack's content. Additionally, shortcuts to categories and tone qualities provide a quick way to jump right where you need to be.

IMPROVED Filter's Musicality

String Studio VS-3's filters can now put up with extreme modulation while remaining totally musical.

NEAT Compatible with String Studio VS-2 sounds

Simply copy String Studio VS-2 banks in String Studio VS-3's packs folder to convert them.

IMPROVED Microtonal tunings via Scala scale files

String Studio VS-3 now supports the Scala scale file format as well as reference note frequency tuning for microtonal music making.

EXPANDED Multi-Effects Module

String Studio VS-3's multi-effects module now sports reverb, equalizer, compressor, and guitar amplifier processors for even more
