

KR-55C Features:

- Includes all of the original preset rhythms from both the KR-55A and the KR-55B, resulting in a total of 240 factory patterns, intros, and fills
- 200 additional rhythm and sound presets, including new kits of instruments matched and tuned to specific genres, with patterns that demonstrate each of the sounds in sequence
- Instrument panel for mild or extreme sound editing with Parametric EQ, Tone, Tune, and Decay settings for each instrument
- Familiar X0X-style 16- or 24-step pattern programming
- Flexible pattern and instrument copy-and-paste capabilities
- Swing percentage setting
- Real-time step entering via Trigger button
- Unlike original, all sounds are independently addressable in user pattern mode
- Easy to use Song Mode with up to 99 patterns and 99 steps per song
- External MIDI sound triggering with velocity sensitivity and user-assignable note mapping
- Mixer panel with independent level, pan, and solo/mute for each instrument
- Effects Routing Matrix with easy-to-use toggle buttons to apply effects to individual instruments in any combination
- Effects panel with studio-quality effects for separate processing of each instrument sound, including overdrive, flanger/chorus, delay, and reverb
- Effects panel also includes a colorful and fun global master compressor and a global bus limiter
- Drag-and-drop export function allows simple mouse-drag conversion of patterns to DAW MIDI tracks (plug-in version) or Standard MIDI Files on the desktop (standalone version)
- Individual outs plug-in version for independent processing of each instrument in a DAW
- Super accurate DAW sync
- User-adjustable oversampling control
- Complete MIDI control and DAW automation for all controls, with easy-to-use MIDI learn and mapping (Preset and Global)
- Cherry Audio's popular Focus zoom-in feature, as well as standard UI zoom and resize via drag
- Complete documentation available directly online from the instrument or in downloadable PDF format
