- Discover the diversity of 80 instantly playable lead instruments.
- Discover the infinite depth of over 1.9GB of sample content.
- Discover the flexibility of 150 complex animated and fully customizable themes.

Navigate the Sonic Frontiers with Horizon Leads' Intuitive Interface

For those familiar with ElySION and The Orchestra, Horizon Leads extends a seamless transition with its user-friendly interface. Embrace the familiar and explore the extraordinary, as all essential controls are thoughtfully placed or intuitively designed for easy access. Navigate the depths of cinematic synthesis effortlessly and let your creativity flow with the comforting familiarity of Horizon Leads' user interface – ensuring a smooth transition for both seasoned users and newcomers alike.

Powerful Features - Supernatural Workflow Horizon Leads features our critically acclaimed ensemble technology, empowering you to create complex sounds by playing simple chords. Modified Ensemble Engine: Horizon Leads uses a modified version of the ELYSION ensemble engine. This means you can play up to four different instrument modules at the same time, and each module allows independent controls for arpeggiators. Using the mod-wheel unlocks an astounding filter effect that produces a great number of kinetic, digital possibilities.

Motion Engine: Horizon Leads comes with its own unique dynamic FX engine. It allows the fundamental customization of the instruments, e.g. steering attack or decay via Midi CC. Besides other FX the Motion Engine includes also two Pan Steppers, breathing life and variation into every pattern in no time.

Ensemble Engine & Mixer GUI

Supercharge Your Creativity Horizon Leads comes with 150 complex animated and fully customizable themes, spread across five different categories. Each category has its unique style and purpose, providing you with animated presets and poly / mono leads that are perfect for playing melodies.

Poly Animations: Immerse your compositions in dynamic soundscapes with Horizon Leads' Poly Animations. These animated presets leverage our cutting-edge engine, introducing pulsating rhythms and evolving textures. Explore a world where each note becomes a journey, adding depth and movement to your sonic creations.

Playable Poly Leads: Unleash expressive melodies with ease using Horizon Leads' Playable Poly Leads. Crafted for instant playability, these presets offer a diverse range of polyphonic lead sounds. From lush textures to powerful motifs, each preset empowers you to weave intricate musical tapestries effortlessly.

Playable Poly Shorts: Tailored for those impactful moments, these presets provide concise and dynamic polyphonic lead sounds. Whether you're scoring a climactic scene or a fleeting emotion, these presets deliver instant sonic impact.

Playable Mono Leads: Command attention with focused and monophonic precision using Horizon Leads' Playable Mono Leads. Ideal for cutting through the mix, these presets offer powerful and singular lead sounds. From bold solos to piercing motifs, each preset ensures that your melodies stand out with clarity and authority.

Playable Mono Shorts: Achieve precision and impact with Horizon Leads' Playable Mono Shorts. Tailored for focused expression, these presets deliver singular and concise monophonic lead sounds. Each preset in this category ensures that your compositions carry a commanding presence, making every musical moment count. Explore the clarity and authority of monophonic leads with ease, bringing a distinctive touch to your sonic narratives.

Once you have been inspired by a theme in Horizon Leads, drag and drop the arrangement of your performance to your DAW. Now you are free to use it within every library you own. Unleash the power of the ensemble engine onto your personal template, change notes, combine different patterns and make them your own.

TOBIAS MENGUSER – THE DESIGNER BEHIND HORIZON LEADS

Tobias Menguser

Tobias Menguser, a sound design veteran since the 1990s, programmed synths for companies like Waldorf and Ensoniq. He played a key role in producing sample CD-ROMs and spent over 10 years at Native Instruments, contributing to Komplete. In the last decade, he provided sounds for 450+ US movie trailers and now focuses on software instrument building for various companies. Based in Mallorca, his latest project, Horizon Leads, showcases his cinematic sounds using analog synths and advanced effect devices.
