And also:

Chords transposition and diatonic transposition

Via the "Tools" > "Transpose" menu you can now transpose chords, and apply a diatonic transposition.

Fixed tempo

In the relative tempo drop-down menu you will find options to force the tempo to a chosen bpm throughout the song.

Piano fingerings

On a piano track, the proposed fingerings will be automatically adapted for the piano.

Piano pedal indications

You will find it in "Effects" > "Sustain pedal" menu.

Copy and paste improvement

• An option to paste chord and scale diagrams by default on simple paste is available in the

Interface Preferences

• Track and master automations are now separated in the special paste dialog

Tempo below 30 bpm

You can now select a tempo below 30 bpm.
